

NOTE: You must be connected to the CISCO VPN CLIENT in order to download SCIX. If you have a LAN-to-LAN setup with STORIS, then you are already connected.

WARNING

PLEASE VERIFY ALL PREVIOUS VERSIONS OF STORIS HAVE BEEN UNINSTALLED

PLEASE VERIFY THAT MICROSOFT .NET 4.5.2 HAS BEEN INSTALLED ON THE COMPUTER

SCIX DOWNLOAD PATH

Type in the following path in Windows Explorer to install SCIX

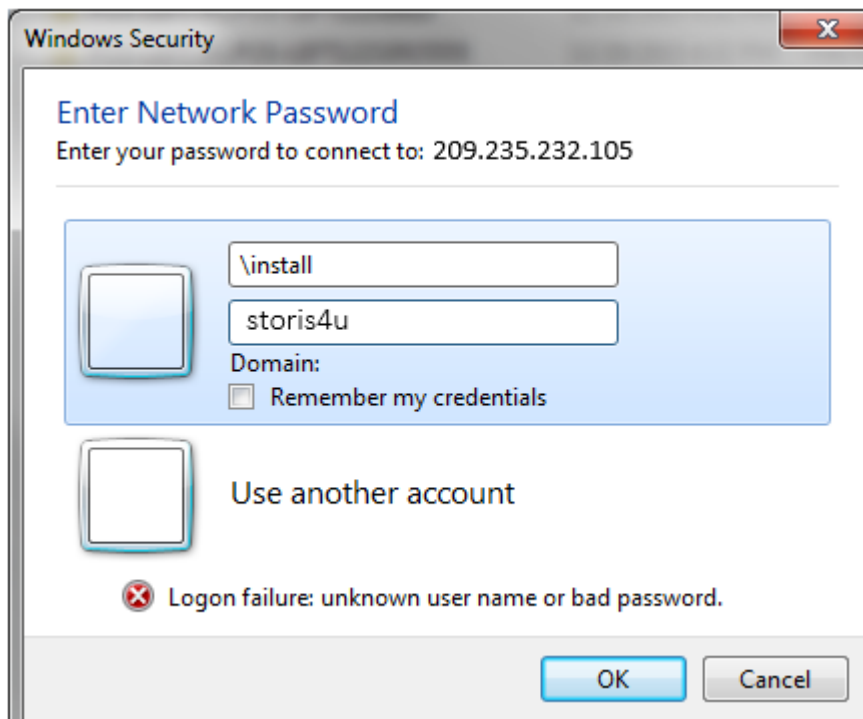

\\209.235.232.105\Deployment\TOUCH\SCIX\setup.exe

You will be prompted for a password.

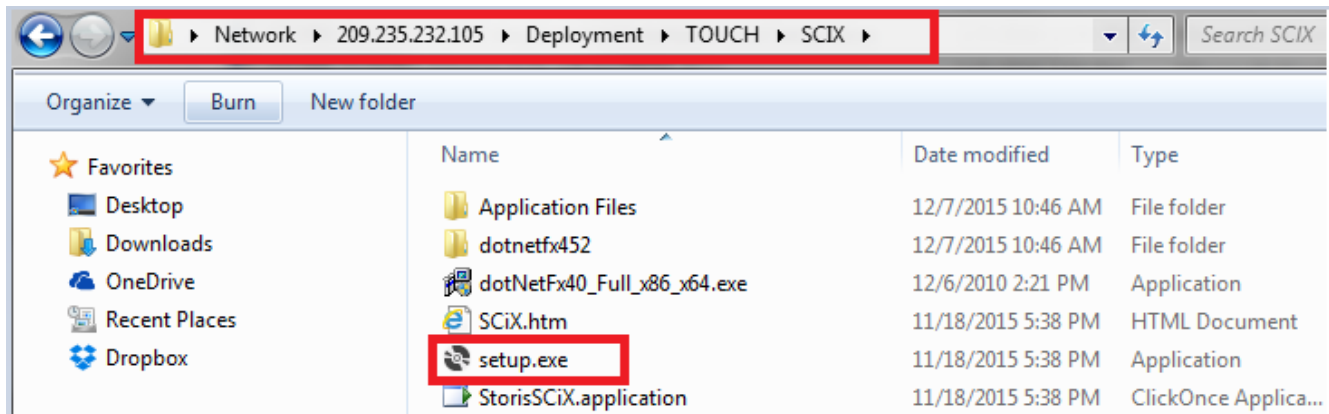

Username: \install

Password: storis4u

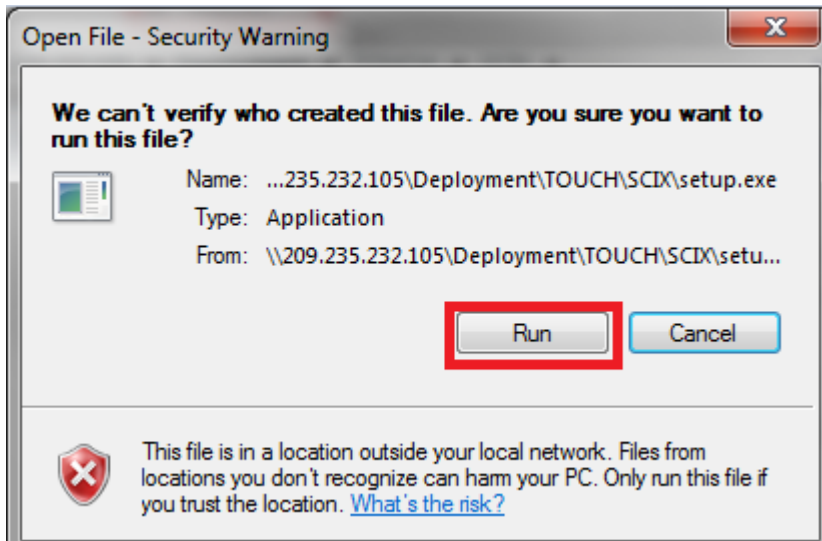

Make sure to check "Remember my Credentials"

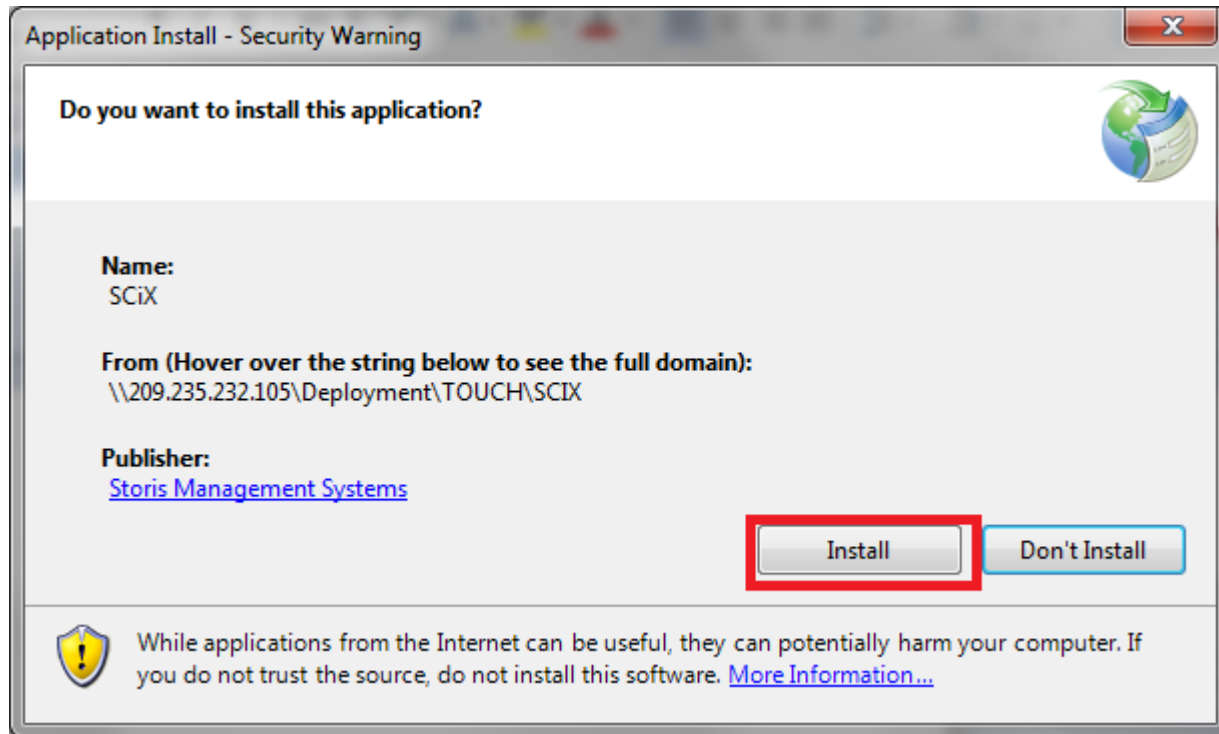

Double click on "setup" to start the install

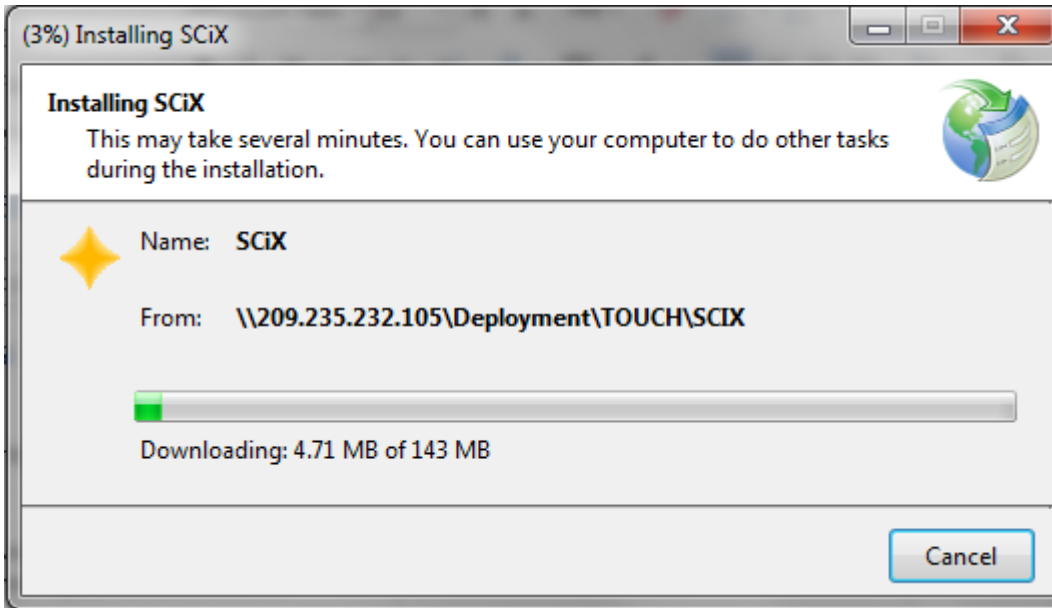

Select Run to install SCiX

Select Install to continue the installation

Please note that the time it takes to download the software from the communications server depends on your network speed and PC.

License agreement "MUST" be accepted to proceed with the install. Once the agreement has been accepted, it will display a "LOGIN"

You will need to enter in a valid user-id and password to log into your STORIS account. You will need to specify the IP address of the communications server when logging in for the first time after a new install. It is suggested that you use the IP address of the server rather than the name in case you have network name resolving issues. Once you have completed your first successful login by choosing "Cloud3", it will change the name in the "Server" field to "Cloud3" going forward.

You will need to uncheck the "Cloud" prompt in order to enter the ip address of the CLOUD3 communication server.

Once you put in your credentials and the ip address, click on "OK" and it will display the message about more that one commsvr is available. You will select "Cloud2" and click "OK"
